

Wall Display and BLU H&T

pack

SIMPLIFIED CONTROL FROM ONE SPOT!

Shelly Wall Display is a sophisticated 4-inch display that brings intuitive control and seamless monitoring to every corner of your smart home. Whether it's dimming the lights, adjusting the room's ambiance, or ensuring optimal energy efficiency, this smart control panel makes home management simple. The highly customizable home screen becomes a reflection of your preferences, offering a quick glimpse of essential home details. Together with Shelly BLU H&T, it can function as a smart thermostat, allowing you to easily fine-tune your heating or cooling.

A SMART THERMOSTAT FOR YOUR HOME

Shelly Wall Display can also function as a thermostat together with Shelly BLU H&T, presenting an intuitive interface for monitoring, managing, and fine-tuning your heating or cooling settings. It works to craft an optimal energy-efficient experience, no matter how large the room is. Working in harmony with other Shelly devices, it dynamically adjusts your heating or cooling settings to maintain the ideal temperature, ensuring your environment is always comfortable and efficient.

Wi-Fi and Bluetooth connectivity

Connect it to your Wi-Fi network. No HUB required! Quick inclusion via Bluetooth or use it as a Bluetooth gateway.

Innovative Touch Display

4-inch high quality color display

Easy navigation

Scroll through different menus and control your devices with just a tap

Innovative ON/OFF touch control

Tap the display with more than one finger to control the lights

Shelly Smart Control App integration

Control directly and without a hub through your smartphone with Shelly Smart Control App

Scene control and scheduling

Quickly set actions based on your own preferences and agenda

Integrated switch

Features a 5 A switch for appliance control

Bluetooth gateway

A smart Bluetooth to Wi-Fi gateway

Power monitoring

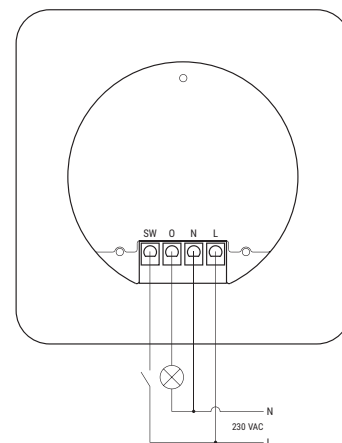

Of all power measuring devices in your chosen room

SHELLY WALL DISPLAY AND BLU H&T

Control all your devices from one centralized place with **Shelly Wall Display**, now combined with **Shelly BLU H&T** for precise climate control. Shelly Wall Display is an intuitive 4" wall display that gives you easy, centralized control and monitoring of all your Shelly devices. With a minimalistic look and customizable home screen, Shelly Wall Display will perfectly fit into your interior and adjust to your needs. Replace your ordinary light switch in 10 minutes and control & monitor all your Shelly devices with just a tap.
